

Men to Men Mentoring, Inc

Mission:

Our mission is to revitalize our communities, one at a time, by empowering men to reach their full potential and rightful place as leaders in their home, society and place of employment.

Vision:

To see communities become self-sustaining through the leadership of men by a programmatic approach developing the skills required to up lift their personal lives. We will accomplish this by addressing the spiritual, emotional, social, physical and financial needs of the men in the community. Our approach is to programatically introduce personal development opportunities designed to create a successful transformation from dependence to inter-dependence.
